

Vantage® | Food

No Bones About It!

Improve the efficiency of your operations with processing solutions from Vantage®

Release agents are food-grade formulations that can be used to prevent dry kibble and pet treats from sticking to molds, belts, and drying surfaces. They are considered processing aids and have been used extensively in the commercial Baking Industry for decades to:

- Reduce production costs
- Prevent sudden line stoppages and product waste
- Keep conveyor belts as clean as possible
- Increase equipment life span

Pet Food Solutions

Water-Based Release Agents

Eliminate sticking, release cleanly, and provide superior protection from residual buildup
Ideal for: Dehydrated treats, jerky

Oil-Based Release Agents

Eliminate sticking, improve product consistency, and decrease waste and cleaning frequency
Ideal for: Dry kibble, oven-baked treats/biscuits

Our *easy and reliable integrated solutions* increase operational efficiency and peace of mind

Processing Ingredients

Our **comprehensive portfolio** offers solutions for a **wide variety** of production applications

-  Release Agents
-  Defoamers
-  Stabilizers
-  Shortening
-  Emulsifiers

Equipment

Our customizable solutions are designed, built, and serviced by **in-house** experts to support any size operation, large, medium, or small

Expert Support

With over **40 years of industry experience**, our equipment, R&D, and sales teams **work collaboratively** with customers to troubleshoot and provide solutions
